Durable Motor with User-Friendly Controls

Patented gear system allows for smooth and comfortable rotation

Hand Grips

Durable hand grips assist the user when mounting and dismounting

Knee Bolsters

Adjustable knee bolsters provide knee flexion when supine and support the leg when prone

Easy-to-Reach Handle

Ratchet handle opens and closes ankle supports, eliminating back strain due to hyperflexion of spine that occurs when securing traditional ankle-lock mechanism

Removable Face Pad

Allows for optimal positioning of cervical spine for treatment in prone position

Adjustable Arm Rests

Padded arm rests add comfort allowing for optimal body positioning for prone treatment

Gravity Lock Ankle Clamp System

Features an aerospace-grade stainless steel gravity lock as a secondary locking mechanism that helps ensure the ankle clamps remain closed while inverted
