

## Better Back™ Comfort Cushion

Get the premium inversion experience with this thick, supportive foam topper for use with Teeter Inversion Tables\*. The Better Back™ Comfort Cushion is designed with a sleek, modern shape and smooth, microfiber surface that minimizes pressure points. Unlike other padded beds that impede body slide, the Comfort Cushion attaches to the unique track-style ComforTrak bed using nodes that slide along the grooves to elongate the body and optimize the decompressive stretch. Cut-outs allow use with the ComforTrak-series Lumbar Bridge accessory (sold separately).

### Enhance the Teeter Inversion Experience

#### Thick & Supportive Foam

Provides a plush surface that minimizes pressure points for superior comfort.

#### Effective Decompression

Node-style attachments follow the grooves in the unique track-style ComforTrak bed, allowing the Cushion to move as you move for optimal body slide and decompression.

#### Accommodates Lumbar Bridge Accessory

Cut-outs accommodate the Lumbar Bridge accessory for ComforTrak-series models to provide added lumbar traction and support (sold separately).

#### Durable Microfiber Material

Smooth surface further promotes body slide, while anti-microbial & moisture repellent fabric is easy to clean.

### Accessorize your Teeter

#### Customized Fit

Shaped to fit the bed perfectly, the soft, padded surface takes Teeter comfort to the next level.

#### Easy On, Easy Off

Simply unscrew the four (4) nodes to remove from the Table Bed.

\*Compatible with ComforTrak and FlexTech-series Teeter Inversion Tables (any Teeter model that accommodates the Acupressure Nodes accessory).
